## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on 02/26/2001. It is noted, however, that applicant has not filed a certified copy of the following foreign priority based application as required by 35 U.S.C. 119(b).

### ***Specification***

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.

- (1) Field of the Invention.
- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

3. The spacing of the lines of the specification is such as to make reading and entry of amendments difficult. New application papers with lines double spaced on good quality paper are required.

#### ***Information Disclosure Statement***

4. The information disclosure statement filed 07/14/2003 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

#### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Wooldridge et al. (USPN 6,086,230).

Regarding claim 1, Wooldridge et al. discloses the farming (Figure 2) including a support face between an inside edge and an outside edge (Figure 1) of the framing for being covered by the periphery of the window (23) that is connected in a sealed manner to the outside edge, the framing including an arrangement on its window supporting face for receiving a light source (24 & 26) and including a housing (31) that is opened both towards the outside of the vehicle (28 & 30), and towards the inside of the vehicle, this housing being arranged to receive the light source in such a manner as to enable it to emit light out from the housing both towards the outside and towards the inside of the vehicle.

Note: claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974). Applicant does not further limit “a single light source” in the claim

Regarding claim 2, Wooldridge et al. discloses the housing is closed, towards the inside of the vehicle, by a wall that is translucent or transparent (window), and *possibly* provided with a filter (28 or 30), so as to diffuse the light emitted by the light source towards the inside of the vehicle.

***Allowable Subject Matter***

7. Claims 3 & 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kocsi et al. (USPN 4,912,607) – visor emergency lighting apparatus

Jarocki et al. (USPN 5,211,466) – vehicle rear signal light assembly of the high mounted type

Thau et al. (USPN 6,030,105) – interior lighting unit for vehicles

Currie (USPN 5,400,225) – optical fiber illumination device

Hotovy (USPN 4,896,136) – combination break light and interior light for mounting on the door of a truck cap
